# Statement on Java Log4j Vulnerabilities

## **CVE-2021-44228 – Cycognito is not impacted.**

## **CVE-2021-45046 – Cycognito is not impacted.**

CyCognito has completed a comprehensive audit of its systems including the CyCognito website, platform, and its APIs and has reasonably established that CyCognito is not impacted by the Apache Log4j vulnerabilities identified as CVE-2021-44228 and CVE-2021-45046.

There is no direct impact of the Log4j vulnerability to the CyCognito platform. We have thoroughly investigated our own software, third-party components and connected providers. Any use of Log4j has been verified as not vulnerable or patched.

If you have any questions or concerns please do not hesitate to reach out to us at [support@cycognito.com](mailto:support@cycognito.com).
